ATTN: Wing Operations Officer

RE: Consideration for Standing Permission – RPAS Operations at Apple Valley Flyers

1. Purpose

Apple Valley Flyers is writing to request your **consideration** in establishing a standing agreement to allow our members holding a Pilot Certificate – Basic Operations to fly at our club field. While our location at 337 Long Point Road is approximately 7 NM from the CFB Greenwood airfield center, we recognize it sits within the designated Control Zone. We seek a collaborative arrangement that ensures safety for all airspace users, including military missions and the local civilian flying community.

2. Proposed Location and Boundaries

The proposed flying area is a 0.5 NM radius bubble centered at the Apple Valley Flyers club field, as illustrated in the attached **Exhibit A**:

- **Center Point Coordinates:** 44.983414°, -064.917045°
- **Location:** 337 Long Point Road, Aylesford East (approx. 7 NM from CYZX).
- **Vertical Limit:** All operations will strictly remain below 400 feet (122m) AGL.
- **Lateral Buffer:** In accordance with Canadian Aviation Regulations for Basic Operations, a minimum **30-metre horizontal distance** will be maintained from all non-involved bystanders (persons not participating in the flight operation).

3. Operational Procedures

To ensure total deconfliction with both military and civilian air traffic—including local flight training and general aviation—Apple Valley Flyers commits to the following protocols:

- **Direct Communication:** The Club Liaison will contact Wing Operations at **902-765-1494 ext. 568-5457**, or via alternative methods as agreed upon with Wing Operations, to provide notification of the start and end of daily club activities if required.
- **Unconditional Right of Way:** Our pilots will yield the right of way to all manned aircraft (military and civilian) immediately upon sighting or hearing them.
- **Awareness of Local Traffic:** We will maintain high situational awareness for civilian training aircraft and private general aviation movements associated with the airfield.
- **Visual Line of Sight:** All operations will be conducted within continuous Visual Line of Sight (VLOS).

4. Desired Outcome

We respectfully ask for your **consideration** in granting standing authorization for these activities. Given our location on the outer edge of the primary Control Zone, we believe this structured approach supports the local modelling community while fully deconflicting with military and civilian flight operations.

We are available for a site visit or meeting to discuss any additional requirements you may have.

Sincerely,

Anthony Watton

President, Apple Valley Flyers
