PRO

Several Class F restricted areas (CYRs) have been established in the Alma region for the flight testing of Remotely Piloted Aircraft (RPA). These CYRs are activated occasionally by NOTAM, issued 48 hours to 7 days in advance. No person shall operate an aircraft within an active CYR unless authorized by the User Agency as stated in the Designated Airspace Handbook (DAH). Once authorization has been obtained, pilots must contact the UAS CE Range Safety Officer on Alma MF UNICOM (122.35) to receive final clearance to operate within the active CYR. Unless the flight is deemed essential (MEDEVAC, law enforcement, emergency, etc.) access may be delayed. When CYR651 is active and use of the Alma airport is required, pilots must complete this two-step procedure prior to any ground access to the runway, and prior to any entry into the CYR in flight. Once authorized, pilots must enter and exit CYR651 from the northeast; operations are then limited to circuit procedures for arrivals and departures at the airport only. See Alma VTPC for depiction of the CYRs.

CAUTION

Parachute jumps over apt to 12,500 ASL, (DT 12-24Z) May-Sep. Possible win maint eqpt on rwy outside ops hrs. Migratory bird activity Apr-Nov.
Possibility of vehicles on rwy May-Sep, marking/sealing work.
